

DEK SMT Stencil Roll Under Screen Cleaning Fabric , 11m Length

The SMT stencil wipes are designed for used in SMT (surface mount technology) screen printing lines. They are designed to keep stencil apertures clean of paste residues during the automatic screen printing process.They also clean the bottom of stencil to keep them free from paste and flux between prints.

Feature:

1. High absorbent and exceptional low lint levels
2. Remove the excess paste, adhesive and solvents that can ruin any PCB boards
3. High strength, even in wet
4. Cut down-time and keep screen printers effectively and efficiently
5. Roll can be custom made to suit your exact requirement
6. Lint free for screen/stencil cleaning

SMT Stencil Roll Under Screen Cleaning Fabric for DEK

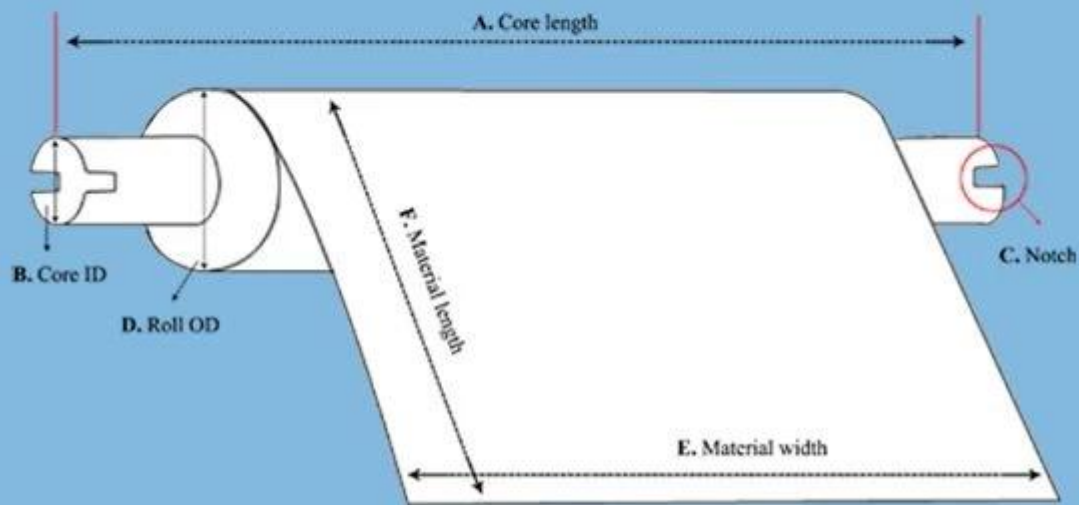

DEK Rolls Part#	Core Length	Core ID	Roll OD	Paper Width	Feet Per Roll
4201DK	21.25"	.75"	2.5"	21.25" (540mm)	36' (11M)
4202DK	20.87"	.75"	2.25"	20.12" (511mm)	36' (11M)
4202DK-W	20.87"	.75"	2.25"	20.12" (511mm)	36' (11M)
4202DK-45	20.87"	.75"	2.25"	20.12" (511mm)	45' (14M)
4202DK-12	20.87"	.75"	2.25"	12" (300mm)	36' (11M)
4202DK-14	20.87"	.75"	2.25"	14" (350mm)	36' (11M)
4202DK-16	20.87"	.75"	2.25"	16" (400mm)	36' (11M)

OEM Stencil Wipes Roll guide:

SMT Roll Specification

Custom SMT Stencil Roll Specification

- A. Core Length
- B. Core Inner Diameter
- C. With Notch or not
- D. Roll outer diameter
- E. Material Width
- F. Material Length

Choose Raw Material

SMT Stencil Roll Material

55% wood pulp & 45% polyester

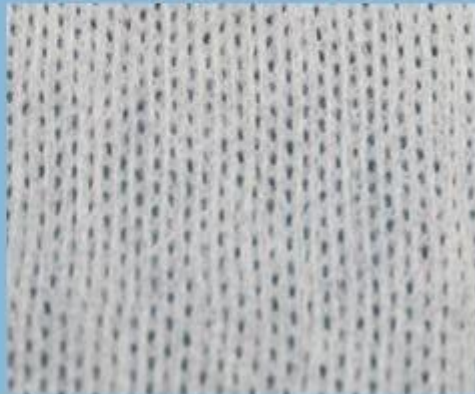

viscose & polyester / parallel

100% polypropylene

viscose & polyester / mesh

Choose Core type
